-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-3 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☒ Certified copies of the priority documents have been received in Application No. 10/281,394.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Priority

1. This application is a divisional of Application No. 10/231,394, filed August 30, 2002 which is now US 6,657,086. There is no application data sheet nor a reference to the claim for domestic priority in the first sentence of the specification.

If applicant desires priority under 35 U.S.C. 120 based upon a previously filed application, specific reference to the earlier filed application must be made in the instant application. For benefit claims under 35 U.S.C. 120, 121 or 365(c), the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of the applications. This should appear as the first sentence of the specification following the title, preferably as a separate paragraph unless it appears in an application data sheet. The status of nonprovisional parent application(s) (whether patented or abandoned) should also be included. If a parent application has become a patent, the expression "now Patent No. _____" should follow the filing date of the parent application. If a parent application has become abandoned, the expression "now abandoned" should follow the filing date of the parent application.

If the application is a utility or plant application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the specific reference must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a utility or plant application which entered the national stage from an international application filed on or after

Art Unit: 1621

November 29, 2000, after compliance with 35 U.S.C. 371, the specific reference must be submitted during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A priority claim filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed claim for priority under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted), (2) a surcharge under 37 CFR 1.17(t), and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was unintentional. The petition should be addressed to: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

Claim Rejections - 35 USC § 112

2. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1621

Claim 1 recites the limitation of “R5 is ... phenyl, 1- or 2-naphthyl, or biphenyl radical, where the rings or ring systems are substituted one or two times by F, Cl, Br, 1, CN ... with the proviso that R5 is not unsubstituted phenyl, 4-fluorophenyl ...”. This is confusing as written as to whether or not the limitations are contradictory or whether the R5 can be unsubstituted in this scenario A. The claim is confusing as to the metes and bounds that are being claimed.

Claims 1 and 2 have the heterocyclic material deleted on page 6 and 10, respectively, of the amended claims. However the limitation “ wherein the alkyl groups in each case have zero to seven hydrogen atoms replaced by fluorine” has not been deleted and it refers to alkyl groups as part of the substituents which are found in the canceled portion of the limitation (i.e. wherein the heterocycle may be substituted C1-C4 alkyl “ etc). Please review and make the appropriate correction.

In claim 1 page 5 and claim 2, page 9 there is a limitation of “ where the aryl radical”. Now it is clear that the phenyl and naphthyl are the aryl radicals but for consistency it would be better to state that “where the phenyl and naphthyl ...”. This is not a rejection just a suggestion for a more cohesive flow of the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1621

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Chem abs 305 CA:54:50305).

Chem abs 305 teaches a compound of formula 1 in instant claim 1 wherein R1-4 are hydrogen, X is SO, Y is (CH₂)_p wherein p is 0 and R5 is a naphthyl ring which is unsubstituted. This is covered by (A) in claim 1 since it is unclear whether or not unsubstituted or substituted is required since there is a proviso that the phenyl group cannot be unsubstituted which seems to indicate that the other aryl group can also be unsubstituted.

4. Claims 2-3 are free of prior art. The prior art does not anticipate or suggest the compounds wherein at least one R1-R4 is not hydrogen.

CA:55:124710 has all the R5s provisoed out except for the unsubstituted naphthyl which would be cumulative to the 102(b) rejection as anticipated by Chem abs 305. There is also no motivation to prepare the homologues since the process is oxidation of sulfur compounds which are specifically stated.

US 3,016,348 teaches a homologue of the R5. However the prior art is directed to catalysts which purify sulfided hydrocarbons and catalysts are well known as being unpredictable (no motivation to modify).

US 3,043,824 teaches homologues and provisoed out R5 compounds but there is no motivation to modify.
